https://github.com/RubyKumariR

EDUCATION

Bachelor of Engineering (B.E.) -Computer Science
K.S Institute of Technology| CGPA: 9.33/10 | 2027

TECHNICAL SKILLS

- **Programming Languages:** C,Java,Python,Golang,DataStructures,Algorithms.
- **Web Development:** HTML,CSS,JavaScript,Node.js,Express.js,Frontend Development.
- **Full Stack Development(MERN)**
- **Database :** SQL,MongoDB.
- **Tools:** Moqups,Git,Github,Gitlab,Postman,Dbeaver.

EXPERIENCE

Web Development Intern
H.E.A.R Pvt.Ltd (Incubated under Start-Up Cell,Sathyabama Institute of Science and Technology)
July 2025-Oct 2025(till 10th Oct)

- Built responsive user interfaces with React JS, JavaScript,HTML and CSS.
- Worked on UI/UX improvements and collaborated with the team for feature development.
- Gained hands-on experience in frontend development and integration with backend APIs.
- Improved app responsiveness by 30% through optimized component design.

Golang API Developer Intern
Centre of Excellence in Postal Technology (CEPT), India Post (Dec 2025-presently working)

- Developed **RESTful APIs using Golang** for internal enterprise applications.
- Implemented APIs to handle **data retrieval, filtering and case-based responses**.
- Performed **API validation, error handling, and testing** using Postman.
- Collaborated with cross-functional teams to deliver backend features

PROJECTS EXPERIENCE

Business Card Generator | *HTML, CSS, JavaScript* ***GitHub - RubyKumariR/project***

- Developed a responsive web application that generates customizable digital business cards.
- Implemented dynamic input handling with JavaScript to update card details in real-time.
- Designed an interactive and modern UI using CSS for better user experience.
- Enabled users to download or share the generated business card**.**

Algorithm Visualizer | ***HTML, CSS, JavaScript*** ***GitHub - RubyKumariR/coder-project***

- Developed an interactive tool to visualize sorting and searching algorithms step-by-step.
- Enhanced user understanding by integrating animations and adjustable speed controls.

- Applied clean UI/UX principles for clear representation of algorithm execution.

Vacation Rental Platform|MERN Stack Project https://github.com/RubyKumariR/StayNest-A-full-stack-accommodation-booking-platform-

- Developing a MERN stack web application for property listing and booking management.
- Implementing features for user authentication, property search, and booking system.
- Continuously enhancing the application with new functionalities and bug fixes.

ACHIEVEMENTS & LEADERSHIP

- Selected for prestigious mentorship programs by **Goldman Sachs ,Dell Technologies and Morgan Stanley(2025)**
- **JP Morgan Design Challenge**
- **Katalyst NGO Scholar(2024-Present):**Part of a women-in-tech initiative offering mentorship,skill development and leadership training.
- Volunteer, **Placement Cell(2025)**-Coordinated placement drives & recruiter interactions.
- **National-Level Hackathon,RVCE(2025):**Team advanced to Round 2 with an innovative web solution.
- Participated in **KSEEM & Atria** 24-Hour National Level Hackathon (2026).
